

Kennel Club Agility Liaison Council

Governance Panel Report –April 2024

Micro Height

The Governance Panel is carrying out initial data gathering to understand more about the size and range of dogs we have currently competing in small who might benefit from a micro-height, only competes in AnySize classes or does not compete because they believe the jumps are too high for their dogs. An online survey form for everyone who has dogs that might fit into this category will be released early in May with data gathered over an 8 week period allowing time for some data analysis prior to the meeting.

This will be advertised on regional FaceBook groups and appropriate Agility pages. We will also encourage clubs and trainers to promote this to those who train with them.

A report on this will be provided to the meeting.

Grading Review

Initial work on a grading review is underway and the panel will report at the meeting on the issues that need addressing by the review and what options they will be considering.
