

AHWSG Report

Martin Tait ALC representative on AHWSG

A-Frame

Studies into the impact of dogs impacting onto the A Frame have been started and results will be shared in due course.

Seesaw

A University student has approached looking at Impact forces on dogs landing seesaw in 2 on 2 off position against a 4 on position. Contact has been made to see what support we can offer.

Heart rate studies

A small study has been undertaken measuring heart rate in agility dogs, but data has yet to be submitted,

It has been noted that students carrying out research that may be beneficial to the AHW subgroup may be able to apply for small grants up to the value £1000.

Extreme weather conditions

Further studies and information are being carried out to enable an advice document to be written to provide best advice in extreme heat for events and for handlers on how to cool dogs down after competing
